XKT Engineering Facts

COMPANY OVERVIEW

- XKT Engineering was founded in 1986.
- The company provides services at all stages of the construction process, from fabricating to welding to engineering.
- In addition to bridge fabrication, XKT has expertise in crane fabrication, barge manufacturing, and piling.

THE PLANT

- XKT's 19-acre fabrication site is situated on Mare Island in Vallejo, California.
- The site contains 4.5 acres of indoor fabrication and assembly space, which includes a 35,000 square foot machine shop.

PROJECTS

- XKT has contributed to retrofit and construction projects on the Golden Gate Bridge, as well as the Richmond-San Rafael, Benicia-Martinez and Carquinez Bridges.
- XKT also fabricated piles, expansion joints and service platforms for the new East Span Skyway.
- The U.S. space program relied on XKT to construct the support structure for a 20-story tower used to service Titan IV rockets at Cape Canaveral
